# Marina Kaštela

# The ideal destination for a vacation and a unique nautical experience!

Marina Kaštela – one of the largest and most modern Croatian marinas located in the naturally protected Bay of Kaštel featuring ideal transport connections with the UNESCO's cities of Split and Trogir.

If you want a relaxing vacation or a nautical adventure, the marina's exceptional geographical position, its beautiful coast with 1244 islands and its Mediterranean climate with nearly 2700 sunny hours per year are a guarantee that you will experience the most enjoyable moments.

For all those who love natural, cultural and historical heritage, there are as many as four antique cities within the 30 km area; Split, Solin, Kaštela and Trogir!

The advantages of good transport connections include the vicinity of the airport (7 km), the highway (20 km), and train, bus and ferry routes, which will help you save precious time.

Marina Kaštela is located in the Bay of Kaštel. It is protected from winds by the Kozjak Mountain (N), the Marjan Peninsula (SE) and the island of Čiovo (SW).

Modern content with a wide array of services, an exceptional geographical location and the proximity of Split Airport make Marina Kaštela one of the most visited marinas in Croatia.

## Welcome to Marina Kaštela!

REGATTAS – PROMOTIONS – TRADE SHOWS – EVENTS – CONCERTS  
– WEDDINGS – TEAM BUILDING – NEW MEGA YACHT BERTHS

In the area of the Marina Kaštela Nautical Tourist Harbor, the berths for mega yachts consist of two piers, each approximately 8 m wide, designed for vessel mooring and located on the southern side of the existing breakwater. The length of the western pier is approximately 94 m, while the length of the eastern pier is approximately 115.5 m. Structurally, the piers are designed as spatial frame structures made of reinforced concrete, founded on two rows of piles with submerged wave-damping panels on both sides.

The piers are connected by a reinforced concrete linking structure approximately 8 m wide, also founded on two rows of piles with submerged wave-damping panels on both sides. This connecting section allows firefighting vehicles access to all areas of the mega yacht berths.

The new mega yacht berth will be equipped with rubber fenders and mooring bollards.

Draft for  
berthing:

- Eastern pier: from -2.7 m to -14 m
- Western pier: from -9 m to -14 m

The mooring system includes buoys adjustable to the size of mega yachts for extended stays.

Pier  
equipment:

The piers are equipped with 32 service pedestals for yachts, each with the following connections:

- 1 x socket 4P+E, 32 A, 400 V
- 2 x sockets 4P+E, 125 A, 400 V
- 2 x water taps
- Along the central part of the connecting pier, a vacuum system for pumping black water tanks from vessels is planned.
